

Human Nature

Humans are often blind,
it seems they are a kind,
a kind of brainless creature,
they don't live in harmonie with nature.
Most of them think it's the best,
to act like the rest,
don't thinking about what they do,
they think their life is a test.
but the earth isn't imortal
not far away from the portal,
the portal to another dimension,
the hell on earth,
a world which is worse ...

Rich people are playing in other classes
they ignore the time which passes
but they don't know they're the first
the fist who will burst,
they are the latest,
of evolution illness,
they aren't the greatest,
they act still less.
